

## NOTICE OF CONSTRUCTION

Please be advised that the Toronto and Region Conservation Authority (TRCA) is preparing to re-commence construction of the "Guild Inn Shoreline Regeneration Project".

The Guild Inn Shoreline Regeneration Project was approved under the Environmental Assessment Act in 2004 through successful completion of the *Class Environmental Assessment for Remedial Flood and Erosion Control Projects*, with all approvals for construction received in 2006.

The current phase of work involves raising the elevation of the revetment to the east of the Guild Inn access road, which was partially completed in the fall of 2006. Due to fiscal constraints, the remaining shoreline protection features will be completed in subsequent years as funding becomes available.

Construction will be limited to the east of the Guild Inn access road throughout the month of November. During this time the Guild Inn access road will remain open and the public will be permitted to access the shoreline to the west of the Guild Inn. Public access to the east of the Guild Inn access road will be permitted after 5:00 pm daily and on weekends.

For more information on the Guild Inn Shoreline Regeneration Project please contact:
